Invoice providers allow for
application of AI algorithms.

Open Data Market
Opportunity

€83 Billion
/year

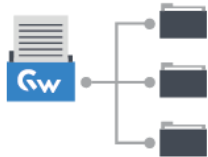

Estimated size of the Open Data
Market for public administration
(2019)
[\(click for source\)](#)

Our capabilities for producing advanced
metrics and predictions will increase as
more public entities publish their data.

GOVWISE's mission

To provide a 360° vision of advanced analytics to **support Public Entities on their decision making process**. Our Artificial Intelligence on Open Data enable us to improve efficiency, reduce costs and increase transparency.

We **revolutionize how the Public Entities analyze, compare and share data**, supporting change on how they are perceived by the Citizens, the Community and Companies.

We achieve **direct impact on Society** aiding the **Public Sector** fulfill diverse **Goals such as the Digital Transformation, Sustainable Development**, Ecological Transition and Expenditure Monitoring.

How do we work Open Data

OPEN DATA FROM THE PUBLIC SECTOR

BIG DATA

**NLP ALGORITHMS AND
MACHINE LEARNING**

DECISION MAKING INTELLIGENCE PLATFORM

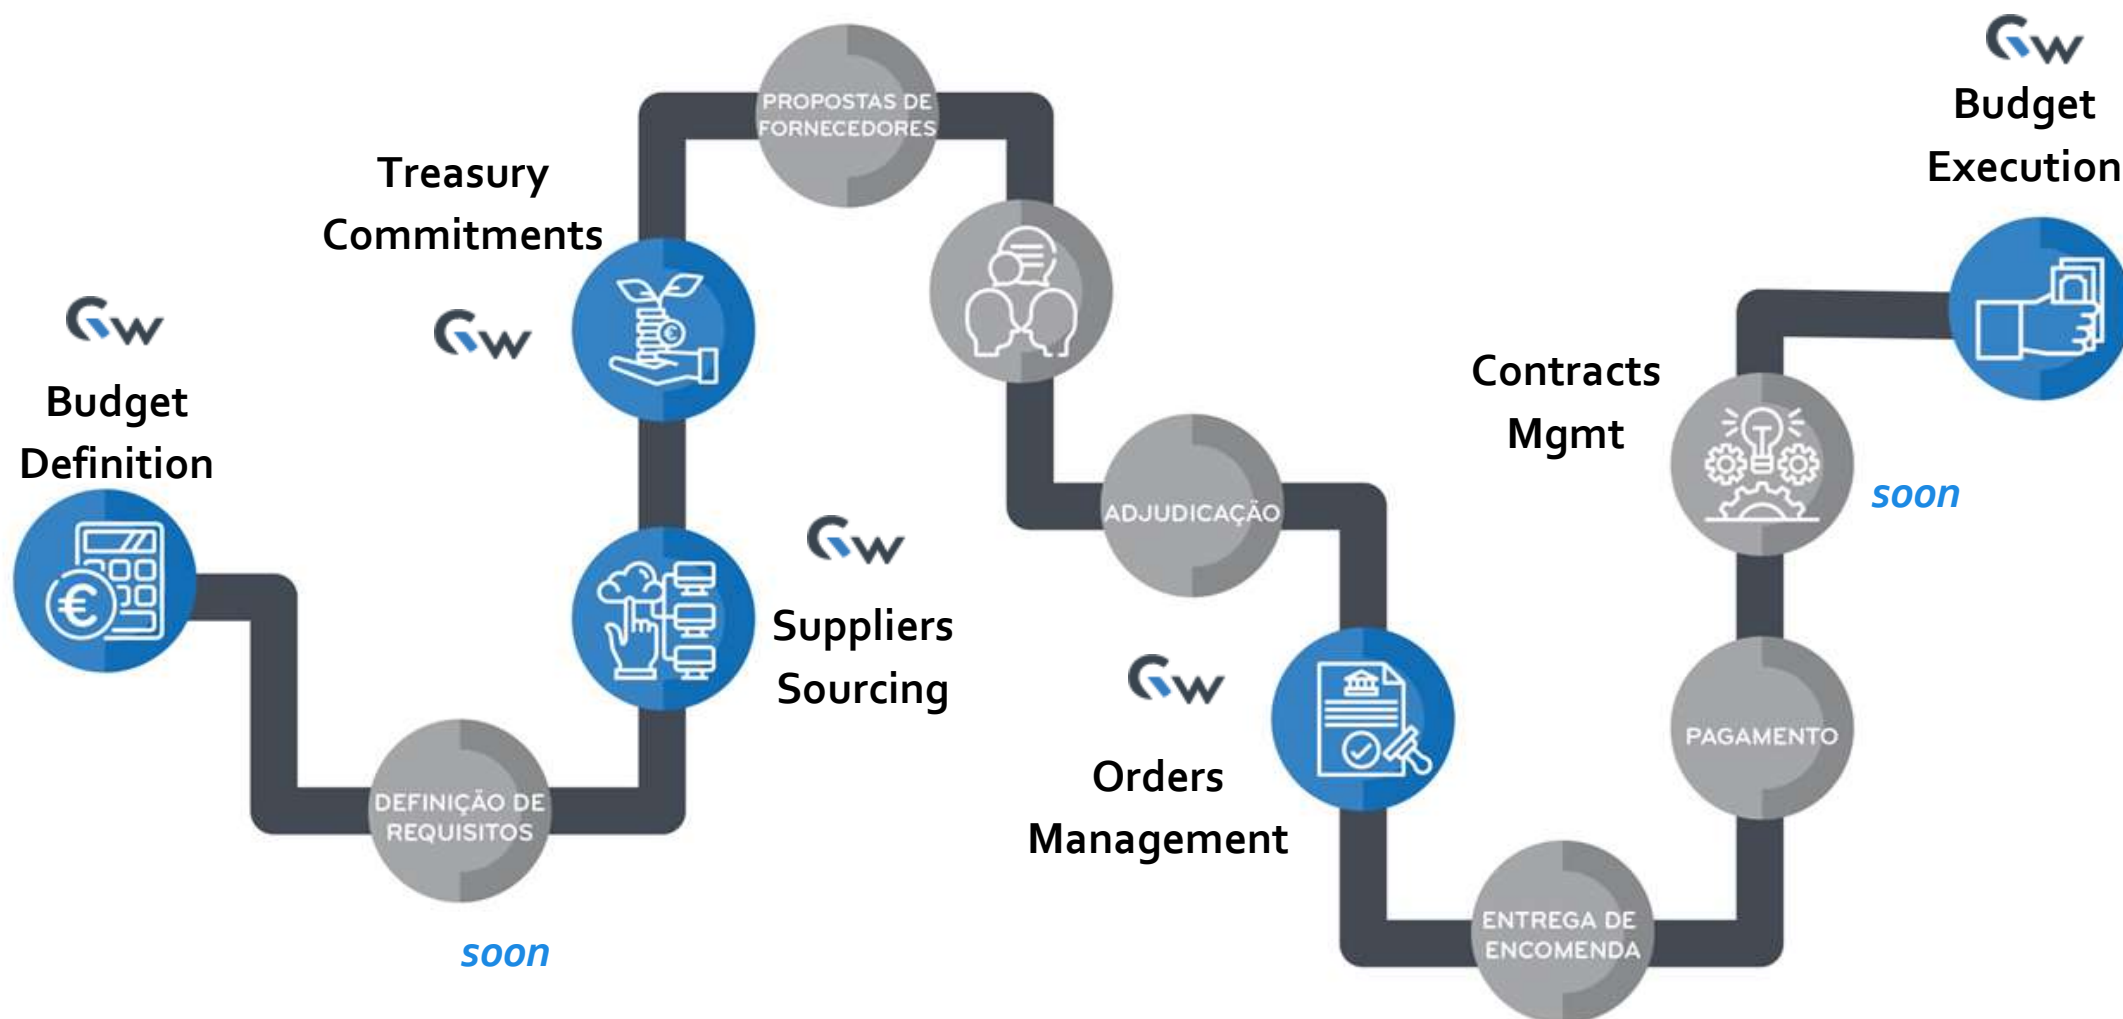

**ADVANCED METRICS FOR
DECISION MAKING**

Extraction, treatment and loading information in
GOVWISE's Data Warehouse

Action Alerts on the Procure-to-Pay Journey

Decision Making with Advanced Metrics

HARMONIZATION OF DATA FROM / INTO SEVERAL SYSTEMS

eINVOICE DATA DIRECTLY TO OTHER SYSTEMS

"We struggle to ensure that we are fulfilling with what is defined by the IAS - International Accounting Standards. We wish we would have a way to harmonise the invoices to the different systems and classifications we have in use."

GOVWISE allows the conciliation of thousands of invoices from different accounting and procurement systems, through an automatic and harmonized process.

AI LAYER OF THE GOVTS' ERP

"I would like to have a precise diagnosis on our Educational Capacity of the Kindergartens within our Municipality."

We managed to interconnect GOVWISE to one of the ERPs used within Public Entities and develop valuable insights through the available data through the most diverse areas:

ACTION ALERTS AND REAL-TIME BUDGET EXECUTION

SMART WARNINGS

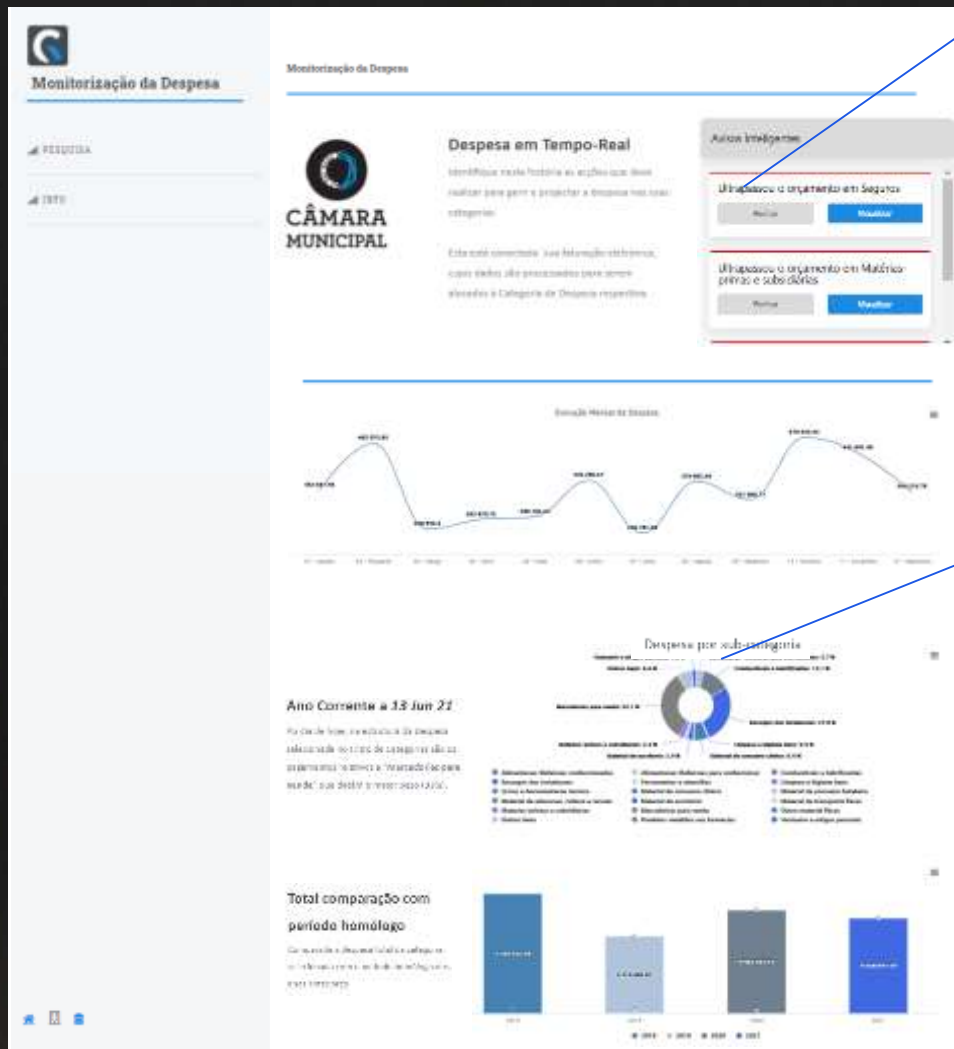

"If someone would let me know in advance what is going well or where we need to improve, I would be able to plan and act more efficiently"

GOVWISE automatically provides users with "Smart Warnings" so that they can be alerted and proceed with decision-making in favor of the interests of the public organization they represent.

BUDGET MONITORING

"Had I clearly seen the data and retrieved quick conclusions, I could have had better results in my management actions"

A smart solution that automatically monitors your budget, with regular insights on the status and evolution of your expenses, with different comparisons by time period and budget categories.

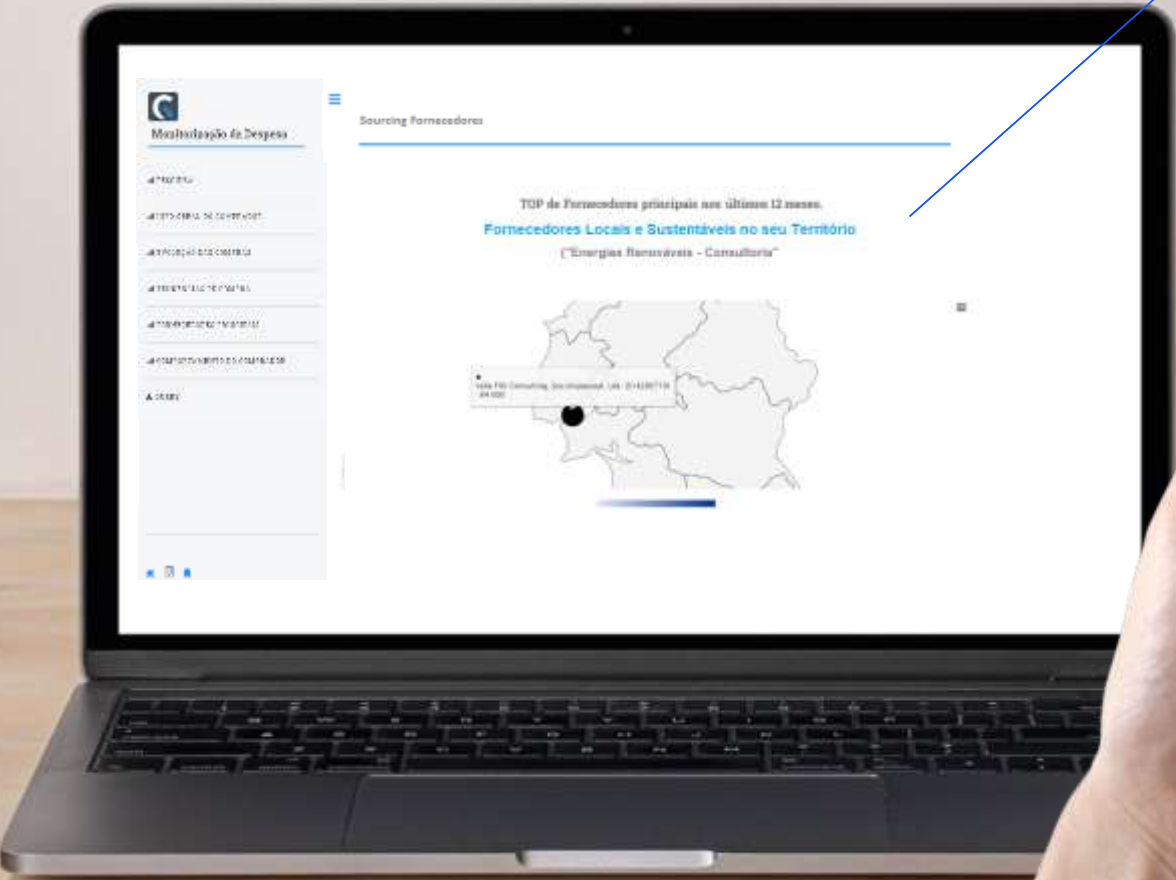

GREEN PUBLIC PROCUREMENT

SUSTAINABLE PURCHASES

"It is essential for us to improve our supplier network and work with those who are more sustainable, considering the Sustainable Development Goals (SDG)"

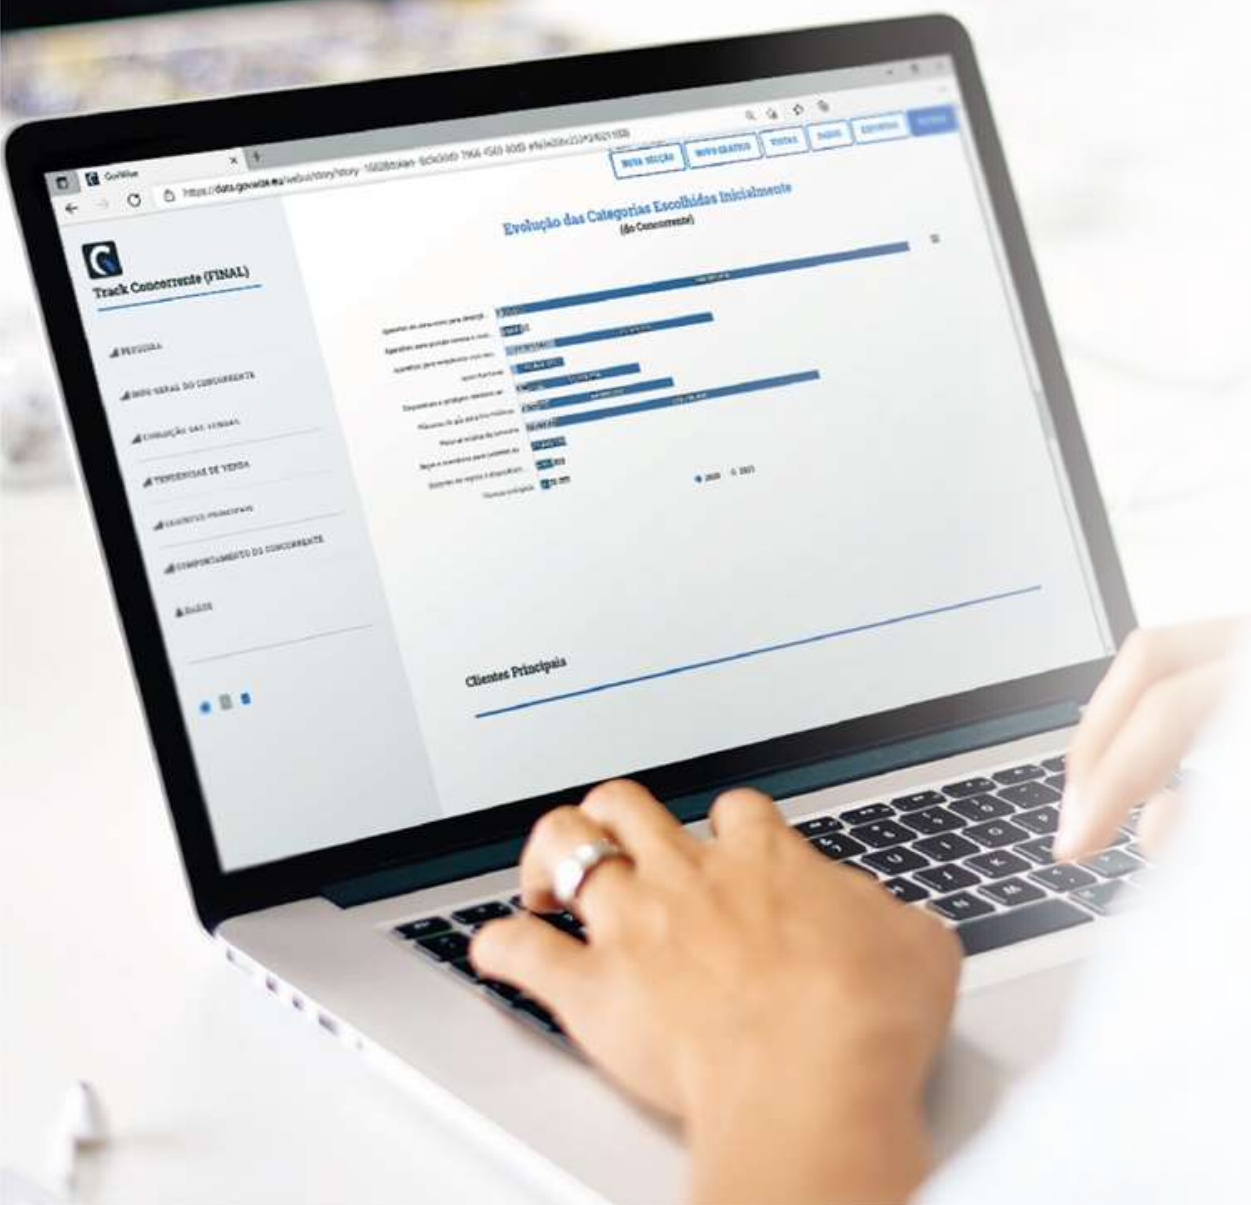

Get to know the criteria for sustainable public procurement you must consider in your purchases, and which technical specifications are required to reach the best suppliers.

LOCAL SUPPLIERS

"I wish to boost local businesses and work with suppliers in my community."

Supplier analysis that allows you to know the best local and national companies for the categories that interest you the most.
